Dear Colleagues,

It is with great pleasure that I extend a formal invitation to the Advanced Facial Surgery Course, taking place in Naples, Italy, on September 5–6. The course is organized by AICPE with the endorsement of ISAPS. This prestigious educational event will convene distinguished surgeons and esteemed faculty to demonstrate and discuss state-of-the-art surgical techniques in facial plastic and reconstructive surgery.

Over the course of two days, highly trained specialists will perform live surgical demonstrations, providing a comprehensive overview of advanced procedures, with an emphasis on precise surgical planning and individualized patient management. The program underscores the principle that surgical interventions should be tailored to each patient's unique anatomical and clinical needs, rather than employing a universal approach.

The scientific agenda will cover both superficial and deep anatomical planes, with a specialized focus on videoendoscopic surgical techniques. Participants will be exposed to a range of minimally invasive procedures as well as complex reconstructive interventions. Whether early-career surgeons or experienced practitioners, attendees will have the opportunity to engage in expert-led discussions, refine their approach, and enhance their surgical expertise in a dynamic and collaborative learning environment. This course is meticulously designed to offer scientific enrichment and professional revitalization, ensuring that participants return to their practice with renewed knowledge and enhanced technical precision.

The historic and vibrant city of Naples serves as an inspiring setting for this academic exchange. In addition to its scientific and educational significance, the course offers attendees the opportunity to experience Naples' rich cultural heritage, its renowned artistic legacy, and its world-class hospitality.

For those interested in extending their stay, we highly recommend exploring the iconic islands of Capri, Ischia, and Procida, the scenic Amalfi and Sorrento Coasts, as well as the archaeological treasures of Pompeii and Mount Vesuvius. Additionally, a curated gastronomic and enological experience will be available for participants who wish to immerse themselves in Italy's celebrated culinary traditions.

I look forward to welcoming you to Naples this September for this distinguished educational event, organized by the Italian Association of Plastic and Aesthetic Surgery. This is a unique opportunity to engage with leading experts, expand your professional network, and contribute to the advancement of facial surgery.

Sincerely,
The Organizing Committee of the Advanced Facial Surgery Course
